

History of VHS

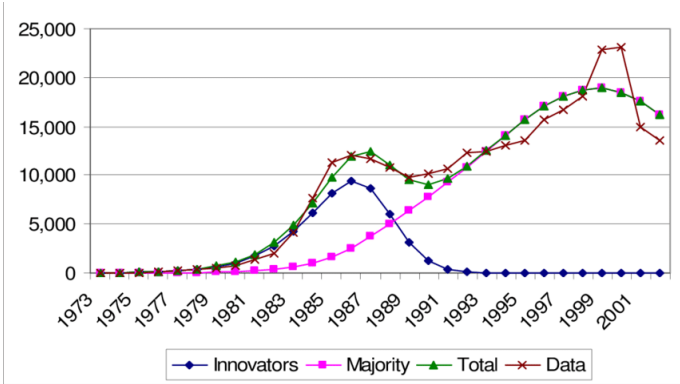

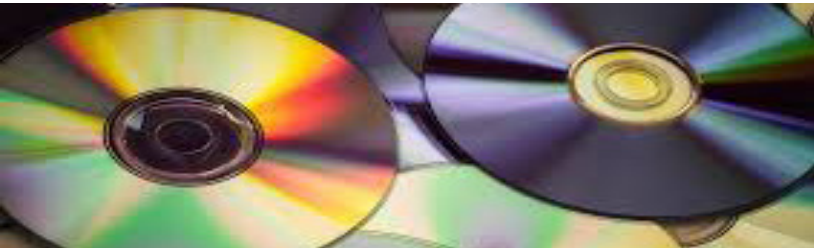

Jeremiah Anderson

Peak VHS Performance

The rise of video rental stores, like Blockbuster, further fueled the popularity of VHS. VHS tapes became a cultural phenomenon, with families recording graduations, weddings, and other special occasions.

Late 1990s

Introducing the start of a new wave Digital media aka DVD
DVDs began replacing VHS tapes gradually from the late 1990s and into the early 2000s, with VHS tapes becoming less popular as DVD's superior quality, features, and convenience took hold.

Late 2000's

The Death of VHS

With the rise of DVD players and Streaming services in the late 2000's we would see a steady decline from VHS. Being surpassed by DVD in 2003. The last movie to be produced in VHS format was "A History of Violence" in 2006.

1976

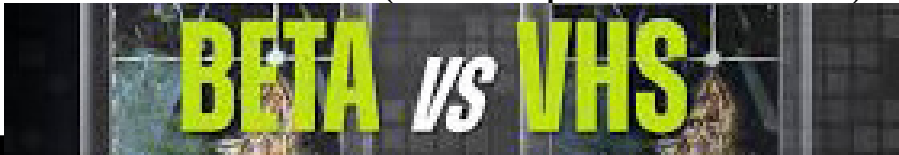

JVC HR-3300 VIDSTAR The First VHS

This is the worlds first ever VHS tape released in 1976 by JVC, a Japanese company, developed the VHS format in 1976, introducing it to the market as an alternative to Sony's Betamax, which realeased earlier that same year,

1980

Beta-Max Vs VHS (Videotape Format Wars)

VHS emerged as a competitor to Sony's Betamax format. While Betamax initially had superior picture quality, VHS offered longer recording times and was more cost-effective, ultimately winning the "format war".

Height of VHS Popularity

1985

Popularity of the VHS was at an all time high at this pe-riod winning the format wars. VHS allowed people to record and watch movies at home changing how people consumed media. The VHS format fueled the growth of video rental stores, which became a cultural phenomenon.

2016

End of an Era

Funai Electric (known as Sanyo) sold its last VCRs in 2016 after making the videocassette recorders for over 30 years. Panasonic stopped selling VCRs shortly before then in 2012. And Distribution Video Audio sold the last VHS tapes ever made in 2008.
